

EVS – EQUIPMENT VALUATION SERVICES

In addition to **SENTRY**, **TOTAL**, and **RECON**, EMTS offers the following valuation services for all types of capital equipment. Pricing for this service is quoted on a per hour or per project basis.

Fair Market Value – The dollar amount that may reasonably be expected for property in exchange between a willing buyer and a willing seller with equity to both, neither under any compulsion to buy or sell and both reasonably aware of all relevant facts.

Equipment Inventory Appraisals – The appraisal of goods manufactured or acquired for eventual resale to customers. This process typically requires an extensive on-site inspection of the product materials, work in process and finished goods, followed by additional research to determine the current value.

Liquidation Value – The estimated gross dollar amount which could be typically realized from a sale, given a reasonable period of time to find a purchaser(s), the seller being compelled to sell on an as-is/where-is basis.

Insurance Replacement Cost – The replacement cost new as defined in the insurance policy, less the cost new of the items specifically excluded in the policy, if any.
